DOMESTIC QUARANTINE NOTICES

WHITE-PINE BLISTER RUST

AMENDMENT OF ADMINISTRATIVE INSTRUCTIONS DESIGNATING CONTROL AREAS

On October 17, 1951, there was published in the Federal Register (16 F.R. 10607), a notice of proposed rule making concerning an amendment of administrative instructions designating control areas (7 CFR, 1950 Supp., 301.63-3a), under the provisions of the White-Pine Blister Rust Quarantine and the regulations supplemental thereto (7 CFR, 301.63 et seq.). After due consideration of all relevant matters presented and pursuant to the authority conferred upon the Chief of the Bureau of Entomology and Plant Quarantine by § 301.63-3 of the regulations supplemental to the White-Pine Blister Rust Quarantine (7 CFR 301.63-3), under section 8 of the Plant Quarantine Act of 1912, as amended (7 U. S. C. 161), the said administrative instructions are hereby amended by deleting the portion therein relating to the State of Maryland and substituting therefor the following:

§ 301.63-3a Administrative instructions designating control areas. * * *

Maryland. European black currant plants may not be moved interstate to any destination in Maryland.

Gooseberry and currant plants, other than European black currants, may not be moved interstate to any destination in Maryland unless accompanied by control-area permits secured from the State Plant Pathologist, University of Maryland, College Park, Maryland. Control-area permits will not be issued for planting within infective distances of protected pine.

(Sec. 8, 37 Stat. 318, as amended; 7 U.S.C. 161; 7 CFR 301.63-3)

The new provisions give greater protection to white-pine plantings throughout the State of Maryland, as recommended and requested by officials of the State Horticultural Department, Maryland Board of Agriculture.

This amendment shall become effective on the 8th day of January 1952.

Done at Washington, D. C., this 20th day of November 1951.

(SEAL)

Avery S. Hoyt
